System Level Test

This system level test document is for testing the add and subtract methods that I used in my ACP program.

Method/Class Name: Add
Description: This method/class takes two integers and returns the sum of the two.

Step	Description	Operation	Result	Pass
1	Input two integers, 5 and 2	5 + 2	7	Yes
2	Return the result as a string.	println method	"5 + 2 = 7"	Yes

Method/Class Name: Subtract
Description: This method/class takes two integers and returns the difference of the two.

Step	Description	Operation	Result	Pass
1	Input two integers, 5 and 2	5 - 2	3	Yes
2	Return the result as a string.	println method	"5 + 2 = 7"	Yes
